TO WHOMSOEVER IT MAY CONCERN

This letter is to introduce our company **M/s SriSahasranam Energy Private Limited**, a premier **Design & Project Management Consultant and a small-scale EPC contractor company** in India. **We specialize in delivering smart building infrastructure, grid electrification, renewable energy solutions & services for a wide range of projects. We maintain zero tolerance for safety violations and uphold a responsible approach to business operations.**

We are committed to delivering innovative and sustainable solutions that address the complex challenges of modern infrastructure. Our expertise spans across multiple domains, ensuring that we can provide comprehensive support throughout the entire project lifecycle.

M/s SriSahasranam Energy offers a comprehensive suite of services, including:-

- **Design & Engineering Consultancy:**
We specialize in detailed design for a wide range of systems, including power distribution, control systems, and other related components. Our designs are innovative, efficient, and fully compliant with industry standards and regulations.
- **Procurement Support:**
We assist with the procurement process, leveraging our established relationships with reliable suppliers and manufacturers to ensure the timely and cost-effective acquisition of all necessary materials.
- **Project Management:**
Our team provides end-to-end project management services, meticulously overseeing every detail to ensure that projects are completed on time, within budget, and to the highest quality standards. Our team is well-versed in relevant industry standards and regulations, ensuring all compliances and safety in the work.
- **Construction & Commissioning Support:**
Our experienced team provides crucial support during the construction phase, from initial installation to final testing and commissioning, ensuring a seamless and efficient build-out.
- We are particularly experienced in providing comprehensive technical solutions & services across various sectors, **including building automation and energy infrastructure** like Mechanical, Electrical, Plumbing (MEP), Heating, Ventilation, and Air Conditioning (HVAC), Integrated Building Management Systems (IBMS), Surveillance, Illumination, Data-Centre, LV/HV Distribution System and HV/EHV Sub-station etc.
- We enhance building efficiency, safety, and operational performance by coordinating all mechanical and electrical components for optimal function and sustainability.
- We also have a good experience in the **renewable energy sector, specializing in BESS (Battery Energy Storage Systems), Solar, Wind and CBG projects.**

We have a proven track record of successful project execution and we attached our company profile for more detailed information about our capabilities and past projects.

We would be delighted to discuss your specific project needs and explore opportunities for a mutually beneficial partnership. Please feel free to schedule a meeting or phone call at your earliest convenience.

Thank you for your time and consideration.

Sincerely,

Sachin Jain
